CCB-AT TAB

A Quality Product from Econ Healthcare Pvt Ltd

General Information

CCB-AT TAB is a premium product from **Econ Healthcare Pvt Ltd** containing a combination of **Amlodipine 5 mg** and **Atenolol 50 mg**. Amlodipine belongs to the calcium channel blocker class of drugs and helps in relaxing blood vessels, while Atenolol is a beta-blocker that reduces heart rate and blood pressure. Together, they work effectively to control hypertension (high blood pressure) and prevent related cardiovascular complications.

Drug Class

- **Amlodipine:** Calcium Channel Blocker (CCB)
- **Atenolol:** Beta-Adrenergic Blocker

Indications and Uses

CCB-AT TAB is indicated for:

- Management of hypertension (high blood pressure)
- Prevention of angina (chest pain)
- Reducing the risk of heart attacks and strokes
- Controlling heart rate in certain conditions like arrhythmia

This dual-action formula helps in long-term blood pressure management and ensures optimal heart health.

Common and Less Common Side Effects

Common Side Effects

- Dizziness
- Headache
- Fatigue
- Swelling in the ankles or feet
- Cold hands and feet

Less Common Side Effects

- Slow heartbeat
- Nausea
- Low blood pressure (hypotension)
- Shortness of breath
- Sleep disturbances

If you experience any severe side effects like chest pain, difficulty breathing, or swelling of the face, discontinue use and consult a doctor immediately.

Doses and Administration

- **Dosage:** Take as prescribed by your doctor. Typically, one tablet is taken once daily.
 - **Administration:** Swallow the tablet with water, preferably at the same time each day, with or without food. Do not crush or chew the tablet.
-

Warnings and Precautions

- Monitor blood pressure regularly while on this medication.
 - Avoid abrupt discontinuation, as it may worsen your condition.
 - Use with caution in patients with diabetes, as Atenolol can mask symptoms of low blood sugar.
 - Consult your doctor if you have kidney or liver problems, heart conditions, or a history of asthma or bronchospasm.
 - Avoid alcohol consumption, as it may increase the risk of side effects like dizziness and low blood pressure.
-

Drug Interactions

Inform your doctor about any medications you are currently taking, especially:

- Other blood pressure-lowering drugs
 - Anti-diabetic medications
 - Non-steroidal anti-inflammatory drugs (NSAIDs)
 - Digoxin or other heart medications
 - Antidepressants or antianxiety medications
-

Contraindications

- Hypersensitivity to Amlodipine, Atenolol, or any other components of the medication
 - Severe bradycardia (slow heart rate)
 - Cardiogenic shock
 - Severe hypotension (low blood pressure)
 - Heart block greater than first degree
-

Do's and Don'ts

Do's

- Take the medication exactly as prescribed by your doctor.
- Maintain a healthy lifestyle, including a low-sodium diet and regular exercise, to enhance the effectiveness of this medication.
- Inform your doctor if you are pregnant, planning to conceive, or breastfeeding.

Don'ts

- Do not skip doses or stop taking the medication without consulting your doctor.

- Avoid driving or operating heavy machinery if you feel dizzy or drowsy.
 - Do not combine with other medications without medical advice to prevent drug interactions.
-

Before Taking CCB-AT TAB

Before starting this medication, inform your doctor if you:

- Have any existing heart, liver, or kidney conditions
 - Are taking any other medications or supplements
 - Have a history of asthma or respiratory conditions
 - Are pregnant or breastfeeding
-

Disclaimer

This information is intended for educational purposes only and is not a substitute for professional medical advice. Always take **CCB-AT TAB** under the supervision and guidance of your doctor. Do not change the prescribed dosage without consulting your healthcare provider.
