

**Brand Name:** CZONE FORTE-1.5 INJ

**Composition:** Cefoperazone Sodium 1gm + Sulbactam Sodium 0.5gm

---

### General Information

CZONE FORTE-1.5 INJ is a powerful combination of Cefoperazone Sodium and Sulbactam Sodium, belonging to the class of beta-lactam antibiotics and beta-lactamase inhibitors. Cefoperazone acts as a third-generation cephalosporin antibiotic, effectively targeting bacterial infections by disrupting their cell wall synthesis. Sulbactam enhances the efficacy of Cefoperazone by inhibiting beta-lactamase enzymes that some bacteria produce to resist antibiotics.

---

### Indications and Uses

This injection is indicated for the treatment of severe bacterial infections, including:

- Respiratory tract infections
- Urinary tract infections
- Skin and soft tissue infections
- Intra-abdominal infections
- Bone and joint infections

- Sepsis and other systemic infections
- 

### **Common and Less Common Side Effects**

- **Common Side Effects:** Nausea, vomiting, diarrhea, pain or swelling at the injection site.
- **Less Common Side Effects:** Allergic reactions such as rash, itching, or difficulty breathing; headache; dizziness; or fever.

If side effects persist or worsen, contact your doctor immediately.

---

### **Dosage and Administration**

CZONE FORTE-1.5 INJ should be administered by a healthcare professional through intramuscular or intravenous injection. The dosage and duration of treatment depend on the type and severity of the infection and the patient's condition. Always follow the guidance of your doctor.

---

### **Warnings and Precautions**

- Inform your doctor about any history of allergies, especially to penicillins or cephalosporins.
  - Use cautiously in patients with kidney or liver problems.
  - Avoid alcohol consumption during treatment, as it may interact with Cefoperazone and cause adverse reactions.
- 

### **Drug Interactions**

This injection may interact with:

- Blood-thinning medications such as warfarin
- Other antibiotics
- Certain diuretics or nephrotoxic drugs

Inform your doctor about all the medications you are currently taking before starting this treatment.

---

### **Contraindications**

- Hypersensitivity to Cefoperazone, Sulbactam, or other cephalosporins.
  - Patients with a history of severe allergic reactions to beta-lactam antibiotics.
- 

### **Dos and Don'ts**

- **Do:** Complete the full course of treatment as prescribed by your doctor.

- **Don't:** Stop the medication midway without consulting your doctor, even if symptoms improve.
- 

#### **Before Taking CZONE FORTE-1.5 INJ**

- Inform your doctor if you are pregnant, breastfeeding, or planning to conceive.
  - Discuss any ongoing medical conditions or medications with your healthcare provider.
-
