

- Fatigue or weakness
- Dry mouth
- Sweating

Dosage and Administration:

- The dosage should be strictly followed as prescribed by your doctor.
- The tablet is typically taken orally with water.
- If you miss a dose, take it as soon as you remember unless it is almost time for your next dose. Do not double doses.

Warnings and Precautions:

- Use with caution in patients with low blood pressure, heart problems, or liver and kidney conditions.
- May cause dizziness or fainting; avoid standing up suddenly.
- Do not use if allergic to Nitroglycerin or other nitrates.
- Avoid alcohol as it may increase the risk of side effects.

Drug Interactions:

- May interact with medications for erectile dysfunction (e.g., sildenafil), blood pressure medications, and other vasodilators.
- Inform your doctor of all medications you are taking to avoid harmful interactions.

Contraindications:

- Contraindicated in patients with a history of hypersensitivity to Nitroglycerin or other nitrates.
- Not recommended for use in patients with severe anemia, closed-angle glaucoma, or head trauma.

Dos and Don'ts:

- Do take the medication exactly as prescribed by your doctor.
- Don't stop taking the medication without consulting your doctor.
- Don't consume alcohol or take other vasodilators without medical advice.

Before Taking:

- Before starting GLYTRATE 2.6 TAB, inform your doctor if you have a history of heart conditions, low blood pressure, liver or kidney disease, or if you are pregnant or breastfeeding.
- Inform your doctor of any other medications you are taking, including over-the-counter drugs and supplements.
