

## MDTAB

### Composition:

Each tablet contains:

- **Drotaverine HCl 80 mg**
- **Mefenamic Acid 250 mg**

---

### General Information:

MDTAB is a combination medication that provides effective relief from pain and spasms. Drotaverine HCl is an antispasmodic drug that helps relax smooth muscles, while Mefenamic Acid is a nonsteroidal anti-inflammatory drug (NSAID) that reduces inflammation and pain. This powerful combination makes MDTAB suitable for managing various conditions involving pain and muscle spasms.

---

### Class:

- **Drotaverine HCl:** Antispasmodic.
- **Mefenamic Acid:** Nonsteroidal anti-inflammatory drug (NSAID).

---

### Indications and Uses:

- Relief from abdominal pain caused by spasms in the gastrointestinal or urinary tract.
- Treatment of menstrual cramps (dysmenorrhea).
- Management of pain associated with musculoskeletal disorders.

- Relief from post-operative pain and inflammation.
- 

#### **Common and Less Common Side Effects:**

- **Common Side Effects:** Nausea, vomiting, dizziness, headache, and abdominal discomfort.
  - **Less Common Side Effects:** Allergic reactions, rash, diarrhea, and dry mouth. Contact your doctor if any side effects persist or worsen.
- 

#### **Doses and Administration:**

- Take MDTAB as prescribed by your doctor, typically 1-2 tablets per day depending on the condition.
  - Swallow the tablet whole with water after meals to minimize stomach irritation.
  - Do not exceed the recommended dose.
- 

#### **Warnings and Precautions:**

- Inform your doctor if you have a history of liver, kidney, or heart disease.
  - Avoid alcohol consumption while taking MDTAB, as it may increase the risk of side effects.
  - Use with caution in elderly patients or those with chronic conditions.
  - Do not operate heavy machinery or drive if you feel dizzy after taking MDTAB.
- 

#### **Drug Interactions:**

- MDTAB may interact with blood thinners, other NSAIDs, and certain antibiotics.
  - Inform your doctor about all medications, supplements, or herbal products you are taking before starting MDTAB.
- 

#### **Contraindications:**

- Hypersensitivity to Drotaverine, Mefenamic Acid, or any components of the medication.
  - Severe liver or kidney impairment.
  - Active peptic ulcers or gastrointestinal bleeding.
- 

#### **Dos and Don'ts:**

- **Do:** Take MDTAB exactly as prescribed by your doctor.
- **Don't:** Stop or change the dosage without consulting your doctor.

---

**Before Taking MDTAB:**

- Inform your doctor about any medical conditions or allergies.
  - Mention if you are pregnant, planning to become pregnant, or breastfeeding.
